

Manufacturers of high quality kitchen units and D.I.Y cupboards

Measurements for Kitchen and/or Bedroom

To measure your own kitchen and/or bedroom is real easy just follow the steps below and bring your measurements to your closest branch and we will work out a quotation of your dream kitchen and/or bedroom.

- Draw a basic out line of your room where you want your kitchen and/or bedroom units
- Indicate where the doors (opening direction), windows, plugs, electrical point for hob and/or uco, taps, electrical box and light switches
- Measure all the walls in full and write it down on the paper
- Measure from the floor and where the walls begin to indicate where the windows, plugs, taps, electrical points, doors etc. are located
- Measure the height of the ceiling in more than one spot as ceilings heights may differ.
- Measure any openings or arches that are present
- Don't forget to provide us with the measurement of your appliances that you are going to use. Height, width, depth and for you oven the aperture (inside) and outside measurements. Fridge, under counter oven, hob, washing machine, tumble dryer, dish washer etc.

Now you should have accurate measurements that you can bring into our showrooms to get a 3 dimensional diagram and where you can choose colours, doors and top finishes so we can give you a full quotation.

Please see example of measurements taken:
